

FCC, a person had the right to speak, a LEGAL broadcasting station has the right to play news and/or weather reports as a PAYING customer i feel that this i am being well treated and i am pleased with the services i am being payed for. i don't remember reaching out of my pocket for a local radio station, this is my personal spending to listen to these broadcasters and it is unfortunant that local radios are responding in such a rediculous manner. this is a quibbling matter as local radios should learn to deal, they can't try to "control the market" with federal response. as a citizen i feel perfectly able to choose between which Broadcasting stations i'd like to listen to this is not a communist state and therefore imposing that the public listen to only one type of broadcasting station is unethical and it demoralizes the public by limiting their individuality and choice
